This flat prewaxed thread is the toughest thread available. Approximate size is 2/0. Kevlar is perfect for tying bass bugs, cork popper tails, saltwater flies and for spinning deer hair. 50 yard spools. Sold by the dozen.

Perfect Hatch Kevlar Thread

Dealer: \$2.60

Item ID	Color
PH-KEV-12	Black

Kevlar Thread builds durable flies. It is a strong thread for materials that require force to attach to the hook such as deer hair and bucktail. The continuous filaments lie flat on the hook minimizing thread bulk. 50 yard spools. All Perfect Hatch threads sold by the each.

Lead

Spooled lead is a quick, convenient way to add weight to fly patterns. Lead can be wrapped around the hook shank and secured with thread. Smaller diameter lead allows small patterns to be weighted without creating unnecessary bulk. All Perfect Hatch threads sold by the each.

Rio Freshwater Fly Lines

The ultimate, all-round floating line for trout, with ultra-slick performance. The unique profile is designed to load a fly rod at close range, and has a front taper that delivers perfect presentation of flies between sizes #22 and #2. Now built with RIO's proprietary coating technology, SlickCast to create the slickest, most durable fly line with the least amount of friction ever measured.

Designed for the modern, fast-action fly rod. The RIO Grand is a full line size heavier than the industry standard, and features more weight distributed towards the front of the line to easily load faster action fly rods. Built with a short head that is easy to cast, this line is also an excellent choice for novice casters who need a little more "feel" when casting. Now built with RIO's proprietary coating technology, Slick-Cast to create the slickest, most durable fly line with the least amount of friction ever measured.

Ultra-thin, super-sensitive fly line designed for Euro nymphing. The line is deliberately made short (20 feet) so it can be added to the front end of a regular fly line utilizing the thin welded loop on each end. The idea is that anglers can fish their normal fly fishing style with their regular trout line, and when they come to a run they want to fish Euro nymph style, they simply loop the Shorty on and start nymphing. Quick, easy and no need for an extra rod or reel.

RIO-20689	#2-5 Orange/Sage/Olive

The perfect line for Czech, Polish and French style nymphing. A system of special marks on the line has been endorsed and approved by FIPS Mouche, ensuring that competitive anglers do not have to waste valuable fishing time by having their line checked during competition hours. The line is built on a thin diameter, low stretch, supple core to maximize sensitivity and allow for lightning fast hook sets, while a highly visible tip helps anglers detect the slightest of strikes.

RIO-20174	Orange/Sage/Olive

The perfect line for anglers targeting bonefish and other flats species. It has a long head and rear taper to smooth out the loop, and to make long efficient casts, while the mid length front taper produces great turnover and easy presentation of typical bonefish flies. High floating line that will not sink and impede the cast, while a medium stiff core and tropical coating stops the line from wilting in the heat.

Designed for slower action rods; especially bamboo, glass and "classic" action graphite rods. Built to precisely match the industry line standards, this line will not overload such rods - even at longer range. The weight distribution and short front taper ensures the line loads at close range, making it ideal for fishing on smaller creeks and streams, while the softer, supple coating ensures the line remains relaxed and easy to handle in the majority of conditions.

Maxima's exclusive chameleon has the unique property of changing hues to match the color of the surroundings, for invisibility in water that is cloudy or lightly stained. Designed for freshwater lakes and rivers, this line has the toughest finish of all line brands on the market. It is ideal for casting and flipping around rocks, brush and other snags. This line makes an ideal fly leader material, especially for the butt section of tapered leaders.

This is Maxima's original green monofilament. Though often attempted, no other manufacturer has duplicated the exclusive color and characteristics of Maxima Ultragreen. This line becomes virtually invisible under water, particularly in freshwater and inshore coastal waters. Ultragreen is also soft and limp, yet retains Maxima's legendary tough, high-durability finish. Ultragreen is the best all-around line for a variety of freshwater and general saltwater fishing, spooling and casting. Ultragreen's invisibility under water also makes it ideal for leader material.

Rio's newest tippet material is an ultra-strong, 100% fluorocarbon with exceptionally high tensile strength. The material is very easy to tie knots in, with high knot strength and a smooth finish that ensures knots seat easily and tightly. The high break strength to diameter ratio makes this a fantastic fluorocarbon for the trout fly fisher.
